DETAILED ACTION

Allowable Subject Matter

1. Claims 1-8 are allowed.
2. The following is an examiner's statement of reasons for allowance: on pages 5-7 of the response filed 04 June 2004, Applicant argues that the embodiments of the instant invention overcome the teachings of Ikemoto et al. (JP 10-214741) because: *Ikemoto et al.* provide a nickel plating to the external electrodes **after** the ceramic article (including external electrodes) is immersed in the water repellent protective material; while the instant invention provides a plating layer to the external electrodes **before** the ceramic article (including the plated external electrodes) is immersed in the water repellent protective material.

A machine translation was used when the rejection of record was made. An official translation was requested to verify some questionable grammar in the machine translation. After careful review of the official translation document, it has been determined that paragraphs 0039-0049 indeed disclose a process wherein a nickel plating is applied to the external electrodes **after** the ceramic article (including external electrodes) is immersed in the water repellent protective material. In addition, Ikemoto et al. provide no motivation to reverse this sequence of steps. Hence, the embodiments of the instant invention are patentable over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
